

## **ROAD CONSTRUCTION PROJECTS**

Road work abounds in the Flathead - and you can expect some traffic delays.

HIGHWAY 93 South - West Shore State Park to Somers - resurfacing will continue to have traffic reduced to one lane through the work zone in June. Delays have been about 20 minutes in May but as summer traffic builds, the delays will likely increase.

HIGHWAY 93 NORTH BYPASS - Foys Lake Roundabout. An overpass is being constructed and the roundabout will be removed. Traffic still flows through the roundabout, but speeds are reduced to 35 and traffic backs up. As summer traffic builds, expect longer delays. This will continue through the end of the year.

US HIGHWAY 2 Between Hungry Horse and Essex is being resurfaced. Pilot cars will be used so expect delays. Also, MT DOT will NOT allow cars to wait in the center lane to turn left into the West Glacier entrance into the Park as they have in the past - when traffic backed up all the way into Coram.

ROAD WORK IN & AROUND GLACIER PARK ... up to a 40 minute delay between Babb and the park boundary and between the entrance station and the Many Glacier Hotel. Your best bet is to check current road closures and delays at [www.nps.gov](http://www.nps.gov) ... Glacier ... Road Construction and Infrastructure Project Work for 2021.
